

# Student Evaluations Are Open

- Please log in to AEFIS and fill out your evaluation for this class. (check your email)
- Take 5 minutes while we are getting set up to do it now!
- We would like to see our numbers above 60%!

# Presentations

# Presentations

- Each project group is required to give a final presentation at the end of the semester.
- Presentations should be well prepared and rehearsed.
- **Final Presentations are a large part of your grade.**

# Presentation Grading

Effectiveness of Presentation (30%)

Title (10%)

Teammates (10%)

Description (20%)

Organization (20%)

Progress (10%)

# Effectiveness of Presentation (30%)

Ensure your presentation is engaging, well-rehearsed, concise, and not too long.

You should give your audience an organized idea of what happened (good/bad/unexpected) in the semester.

You should aim for 8 minutes.

We're looking for **sparkle!** Have fun with this!

# Title (10%) + Description (20%)

Include your full project title in your presentation!

Describe your project to an audience that has no prior familiarity with it.

Explain the purpose of the project and the specific technologies used.

Feel free to touch on why you chose the particular stack.

# Teammates (10%)

Ensure every team member is involved in the presentation!

Instead of "what I contributed" slides for each member, it is preferred that the presentation has a coherent narrative and project members discuss different aspects of it. Pick the biggest changes and have everyone present some part of the slideshow.

# Organization (20%)

Where is your project hosted?

Do you use GitHub Issues, Project Boards, Wiki, etc. for project management?

How are you set up with respect to building community?

Do you have guidelines for new contributors? Getting started documentation? Do you need it? Screenshots are good for this section. Note that you don't need to have any/all of these, but you should have reasons for what you choose.

# Progress (10%)

Show proof of the progress you made over this semester.

What goals did you reach? Which did you not reach?  
Be honest!

**Aim for a demo**, either recorded or live. If live, be sure to have a backup recording in case it goes south.

# Previous Presentation Examples

Check these out as starting points if you're still unsure, but keep in mind we did change the directions slightly this semester!

[OpenCircuits - Fall 2021](#)

[QuACS - Fall 2021](#)

[Poll Buddy - Fall 2020](#)

Talk to your mentor about possibly doing mock presentations for Friday. This is voluntary for both you and them, but can be useful

# Draft Presentation Schedule

- **OpenCircuits**
- **Linux Kernel**
- **OSS Poll Buddy**
- **Visual Novel Parser**
- **Dark Reader**
- **NeRF or Nothing**
- **B-Ris**
- **Submittity/Lichen**
- **Legup**

- Time budget:
  - Every project gets 8 minutes
  - **Please respect your budget!**
- Let us know if you need to change anything.

# Previous Presentation Examples

Check these out as starting points if you're still unsure, but keep in mind we did change the directions slightly this semester!

# Final Contributions

- **EVERYONE** needs to submit their Final Commit Summary to Submittity by **08/17/2022** at **11:59:59 pm**
  - **The report counts for part of your contributions grade**
  - **No Late Days/No Extensions**
  - If you are in RCOS, it is the same format as the Midyear Review
- Every member of the team should include 1 slide at the end of the presentation with their contributions
  - <https://github.com/rcos/CSCI-4470-OpenSource/blob/master/Assignments/Term%20Project/Final%20Report.md>

# Format

You can generate your list automatically by running the following command (requires **git** and **sed** on your computer)

```
git log --author <YOUR NAME OR  
EMAIL> | grep ^commit | sed  
s/"commit "/"https:\\\\github.com\\<GITHUB  
USERNAME>\\<GITHUB_REPO  
NAME>\\commit\\"/
```

If you commit to a branch, you can extend this to get branches using “--branches <BRANCH NAME>” before “--author”

Wesley Turner  
Project: unk  
Commits:

```
Wesleys-MacBook-Pro-2:unk wes$ git log --author wdturner | grep ^commit | sed  
s/"commit "/"https:\\\\github.com\\wdturner\\unk\\commit\\"/  
https://github.com/wdturner/unk/commit/52a2634eb80ca75479c515ac46d3c4b4dac67d
